Per-Pupil Expenditure Across Aggregated Categories³

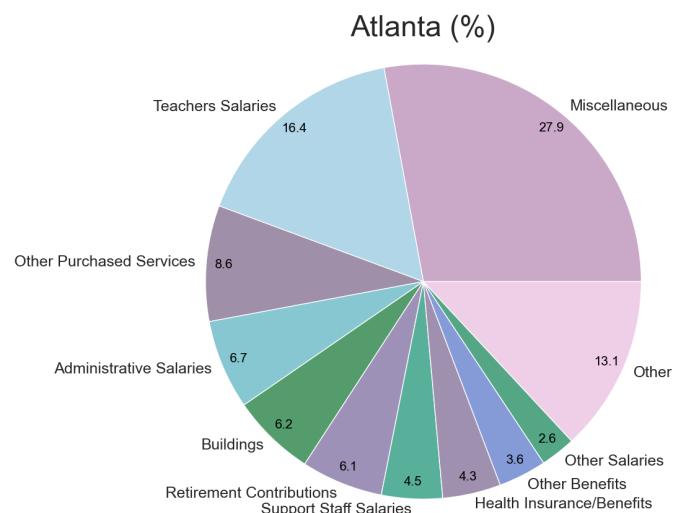

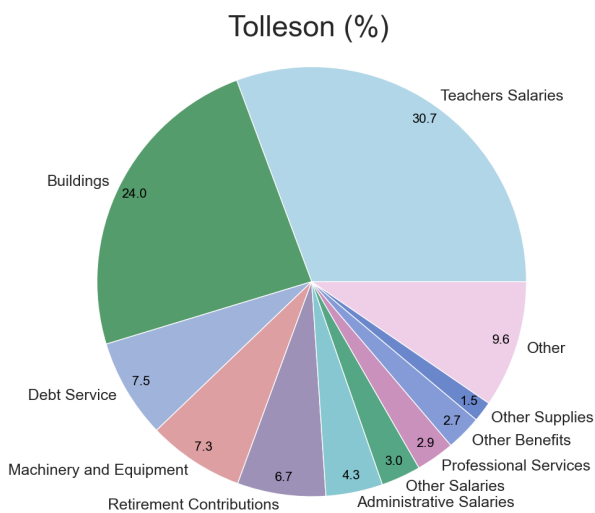

This is sample comment about the bar chart that shows the 7 major categories

1. The data for the District Fast Facts table was sourced from NCIS School District Data from 2018-2019 with the exception of the 'Total Yearly Expenditures' numbers which were sourced from the data noted in footnote #3.

2. If data in this table is marked with 'n/a' then the data is missing from NCIS records.

3. The visualizations and graphics data for the Tolleson District data was sourced from an 'Account Details' spreadsheet provided by the school district. The Atlanta data was sourced from the Georgia Department of Education's Financial Review Data Collection System Budget Analysis Report for the year ending June 30, 2019.
